Year 1 Home Learning

Autumn 2026

Reading

We have recently assessed the children's phonic knowledge and the children have now been grouped together in a RWI group with other children of similar abilities. Within these groups we will be focusing on supporting the children to develop their speed when recalling sounds to enable them to read words with increasing fluency and confidence. Please see this useful video link to support you if you need support with how to pronounce the Set 1 sounds correctly https://youtu.be/O3KYZcqgSFE?feature=shared

The children will also be issued with reading books which match their current level.

In addition to their daily reading, please encourage your child to read or listen to you read on a regular basis at home to help to develop their fluency, comprehension skills and a love of reading.

Maths

We support the emphasis in the Maths National Curriculum that pupils become "fluent in the fundamentals of mathematics". This highlights the importance of children knowing the key mathematical facts and methods and being able to recall them efficiently, and supports their progress in Maths, enabling them to apply their knowledge to rapidly and accurately solve problems.

During your child's Maths lessons they will begin to learn and develop their understanding of key Mathematical facts. The children will be progressing through the White Rose scheme of work. They will also be provided with lots of opportunities and resources to work practically to support them to begin to explain their answers and thinking.

Over the next few weeks, we will send out a reminder of your child's NUMBOTS log in. NUMBOTS is a

comprehensive Maths platform which your child can access from home to support them to develop their fluency when recalling key mathematical facts. Further information regarding this programme can be found here www.numbots.com

The White Rose 1 Minute Maths app is also really helpful for learning how to recognise numbers by sight (subitising) and our number facts.

Topic Tasks

Each half term the children are set a piece of creative homework which relates to a topic which has been explored at school. These projects will be shared in class after each half term. The children may be as creative as they like by making, writing, drawing or using technology to explore the topic and create something to share with the class.

Autumn 1 Topic: Seasonal Changes or My Local Area

This will be shared in the class on Friday 6th November 2026

Autumn 2 Topic: Materials or Fireworks and Celebrations

This will be shared in the class on Friday 8th January 2027
